

RELAYrack

“RELAYrack / Open Frames offer highly cost-effective and assembly-friendly solutions for numerous applications in the field of network technology and electronics.”

- Designed to house 19” standard mounting devices
- Provides quick access to equipment
- Smart design features to be used as single frame or double frame
- Easy to assemble and disassemble
- Delivered as flatpack

D=600 - D=800 - D=1000

RELAYrack single frame, D=600 mm

RELAYrack double frame, D=800 mm

RELAYrack double frame, D=1000 mm

19" RELAYrack / Open Frames:

For those situations where quick access to the equipment is of primary importance.

Generally used in such an environment with negligible dust or dust free, air conditioned, protected against unauthorized access areas. Uprights are punched in full-length with square holes to use standard accessory cable ring for cable management. Levelling feet as standard.

Its sturdy upright frames are 9-fold special frame on each side for maximum stability. Load carrying capacity is influenced by the distribution of the load. However, loads of 300 kg suitably distributed could be considered safe. When using mobile base, care should be taken with excessive loads.

* Please check drawing pages for cabinet sizes.

STANDARD DIMENSIONS:

Height: 16U/22U/26U/36U/42U/48U

Width: 536 mm

Houses all related 19" equipment and devices

Single frame for just 19" frontal assembly

Double frame with 180 mm extension unit, D= 820 mm

Double frame with 300 mm extension unit, D=940 mm

LOAD CARRYING CAPACITY: 300 kg

COLOUR:

RAL 9005 black

RAL 7035 light grey

STANDARDS:

ISO 9001 : 2008 Quality Management Systems

ISO 14001: 2004 Environmental Management System

19" mounting to IEC 297-1

EN 61587-1 mechanical structures (cabinets for electronic equipment)

Overall cabinet dimensions for IEC 297-2

KEY FEATURES

- Single frame unit, provides housing for just 19" frontal assembly installations, compatible with all standard 19" frontal assembly accessories.
- Double frame units, with extension unit in between the base structure of the RELAYrack / open frames D=180mm, frame units will provide 4 point assembly possibility to house all D=800mm range accessories. where the frame base depth becomes 820 mm.
- Double frame units, with extension unit in between the base structure of the RELAYrack / Open frames, D=300 mm frame units will provide 4 point assembly possibility to house all suitable range accessories, where the frame base depth becomes 940 mm, the application field is called servering; the RELAYrack / open frames with this structure becomes SERVER RELAYrack.

Available with hard top

D=180 mm extension kit provides 820 mm depth,
D=300 mm extension kit provides 940 mm depth.

Vertical cable management panel with cover

Used for hiding and protecting networking cable bundles. Can be easily fixed to 4 post or 2 post racks, left and/or right sides.

It is vertical along the rack and has holes for cable entries and pass.

Please define your colour with your order (RAL 7035 light grey and RAL 9005 black). Unless noted otherwise it is delivered as RAL 9005 black.

Server storage and shelving

Designed for server/PC storage and shelving. Managing all devices and servers in professional style, it is functional to access all the way of racks.

It is easy to maintain. All 4 post racks can be bayed side by side.

Can also be used as a device console or device storage rack.

DEPTH = 820 mm

Depth 940 racks match all features defined in the previous pages for RELAYrack.

It is used for of deeper servers and devices

DEPTH = 940 mm

KEY FEATURES

Main framework is of a structure which increase the mechanical resistance with maximal performance, manufactured Omega style profile system, connected to top bracket units and bottom base units with heavy duty fixing hardware ensuring framework stability. Manufactured and tested to provide axial (x, y, z) resistance that meets EN 61587-1 / 5.2.1 and 5.2.2, external impact resistance that meets EN 61587-1 / 5.3.3.

With optional top covers, the system can give the appearance of a closet, as well as offering resistance against falling dust on to installed equipment.

Designed for use a minimally dusty, climatized, and security controlled environment, the system provides a very cost efficient solution.

The system is shipped in flat pack with a superior transport cost scheme.

Levelling feet are standard for stability. The cabinet shall meet standards EN 61587-1, IEC 60917, IEC 60297 and RoHS compliant, shall be Gost and TSE certified.
